

Taiyo Professional Head Massage Tool

Experience a truly new, tingling sensation, bringing you a moment of relaxation!

Stimulates your senses
Eases headache
Improves & rejuvenates hair
Relaxes both mind & body
Unblocks energetic meridians

Directions:

Start massage by gently separating the eight strands simultaneously with one hand. Then begin by sliding the *Taiyo Professional Head Massage Tool* from the crown of the head. Do light and delicate movements, moving upwards and downwards, from the back of the head to the front. From the first few movements, you will feel an exquisite shiver starting from your head, then running down your back. Let yourself go, releasing all parts of your body to the sensation. After a while, this tingling sensation will change to a smooth, warm sensation, releasing tension, relaxing your muscles. Intensity of results may vary according to each individual.

Explanation:

The simultaneous action stimulated by the eight resin ends will touch nerve endings located just below the scalp, pulsating throughout the body. The warm heat sensation occurs due to the stimulation of blood circulation; particularly the scalp, bringing an important volume of oxygen, the main role in transporting nutritive elements to hair follicles; thus improving and rejuvenating hair and scalp condition. Also, a better brain oxygenation helps to decrease headaches and muscle stiffness accumulated during the day.

More information:

Massage with *Taiyo Professional Head Massage Tool* brings a revitalizing and invigorating reaction because of the release of blocked energetic meridians; creating a better circulation. This principal can be compared to the Shiatsu massage techniques based on energy flow.

Taiyo Head Massage helps to balance and harmonize meridians, bringing vitality to organs and specific functions. Psychologically, head massage brings serenity and well-being, favoring better concentration.

Share this moment of relaxation with friends and family, introducing them to a new sensation of relaxation and well-being.
